

# Gro-Wall® Slim Pro

## New Professional Modular Vertical Garden Green Wall System.

New for 2017 is the Atlantis Gro-Wall® Slim Pro. The Gro-Wall® Slim Pro is a new vertical garden green wall system that is built on the success of the Gro-Wall® 4.5 product and provides significant improvements and a thinner profile making the system ideal for applications where space is limited.

The new features include built in drainage, planter tray locks automatically when inserted and the irrigation can now be mounted on the front of the unit as well as in the center of the unit.

The new planter tray is thinner and allows for 6 litres of soil media ensuring healthy plant growth and moisture retention.

Plant to plant irrigation is beautifully balanced providing evenly distributed irrigation to the plant below. It is also now optional, and can be blocked off to allow the water to drain away to a drainage outlet with the use of irrigation pipes. This feature is ideal for indoor applications where drainage outlets are not available or for applications that require plants to be contained so as to prevent plant disease spreading to other plants.
